PROJECTS

Solenoid Automatic Door Lock

April 2026 – May 2026

- Developed an automatic door locking system using Arduino, a solenoid lock, relay module, and keypad for secure access control.
- Integrated a keypad-based password system to authenticate users and control the door locking mechanism.
- Programmed the Arduino to process keypad input and activate the relay for controlled operation of the solenoid lock.
- Implemented password-based access to automatically unlock the door when the correct PIN is entered and keep it locked for unauthorized attempts.
- Built a practical electronic security system demonstrating embedded programming, hardware integration, and automated access control.
- **Technologies:** Arduino • Solenoid Lock • Relay Module • Keypad • Embedded C/C++
